DETAILED ACTION

Claim Rejections - 35 USC § 112

1. Claim 3 provides for the use of 10 formyltetrahydrofolate dehydrogenase, but, since the claim does not set forth any steps involved in the method/process, it is unclear what method/process applicant is intending to encompass. A claim is indefinite where it merely recites a use without any active, positive steps delimiting how this use is actually practiced.

Claim 3 is rejected under 35 U.S.C. 101 because the claimed recitation of a use, without setting forth any steps involved in the process, results in an improper definition of a process, i.e., results in a claim which is not a proper process claim under 35 U.S.C. 101. See for example *Ex parte Dunki*, 153 USPQ 678 (Bd.App. 1967) and *Clinical Products, Ltd. v. Brenner*, 255 F. Supp. 131, 149 USPQ 475 (D.D.C. 1966).

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Scrutton et al.

Claims 1 and 2 recited 10-formyltetrahydrofolate dehydrogenase as either a therapeutic agent and as an anti-tumor agent. Scrutton et al. disclose isolated,

purified 10-formyltetrahydrofolate dehydrogenase. Recitations of intended use fail to impart patentability to an old composition. Therefore, the reference anticipates the cited claims. Claim 3 recites the use of 10-formyltetrahydrofolate dehydrogenase for the preparation of cytotoxic and antitumor medicaments. For the purposes of examination, this claim has been interpreted as claiming 10-formyltetrahydrofolate dehydrogenase. Scrutton et al. disclose isolated, purified 10-formyltetrahydrofolate dehydrogenase. Recitations of intended use fail to impart patentability to an old composition. Therefore, the reference anticipates the cited claim.
